Activity: 2

1. Let's Read some facts about insects

# More about insects

Let's talk

Look at these pictures and tell your friend why bees are useful to us.

Bees spread pollen. This is necessary for fruit to grow.

Bees produce honey.

This bee sucks up the nectar from the flower.

Locusts have strong back legs to jump.

Ants

\_\_\_\_\_ use their antennae to communicate with each other.

Butterflies

\_\_\_\_\_ spread pollen from plant to plant.

Flies

\_\_\_\_\_ spread germs.

2. Read through the worksheets below.
  3. Complete where needed.
- (workbook page 47)

 **Let's write**

What insects did you see outside? Choose one and write its name here.

\_\_\_\_\_

What type of food does this insect eat?

\_\_\_\_\_

Does your insect move slowly or quickly?

\_\_\_\_\_

Is your insect useful? Why do you say so?

\_\_\_\_\_

\_\_\_\_\_

In what way is your insect harmful? What can you do when it harms you?

\_\_\_\_\_

 **Fun**

Now design and draw your own insect and give it a name.

Sign: \_\_\_\_\_  
Date: \_\_\_\_\_

47

Let's do

Draw a line to match each name with the correct insect.  
Say which insects are harmful and which are helpful to us.

Let's write

Now fill in the missing words.

- \_\_\_\_\_ make honey.
- \_\_\_\_\_ pollinate flowers.
- \_\_\_\_\_ spread malaria.
- \_\_\_\_\_ spread disease.
- \_\_\_\_\_ eat farmers' crops.

Bee

Mosquito

Fly

Ant

Locust

Butterfly

Ladybird

Moth
