

Geography Grade 4

Revision - Compass Directions

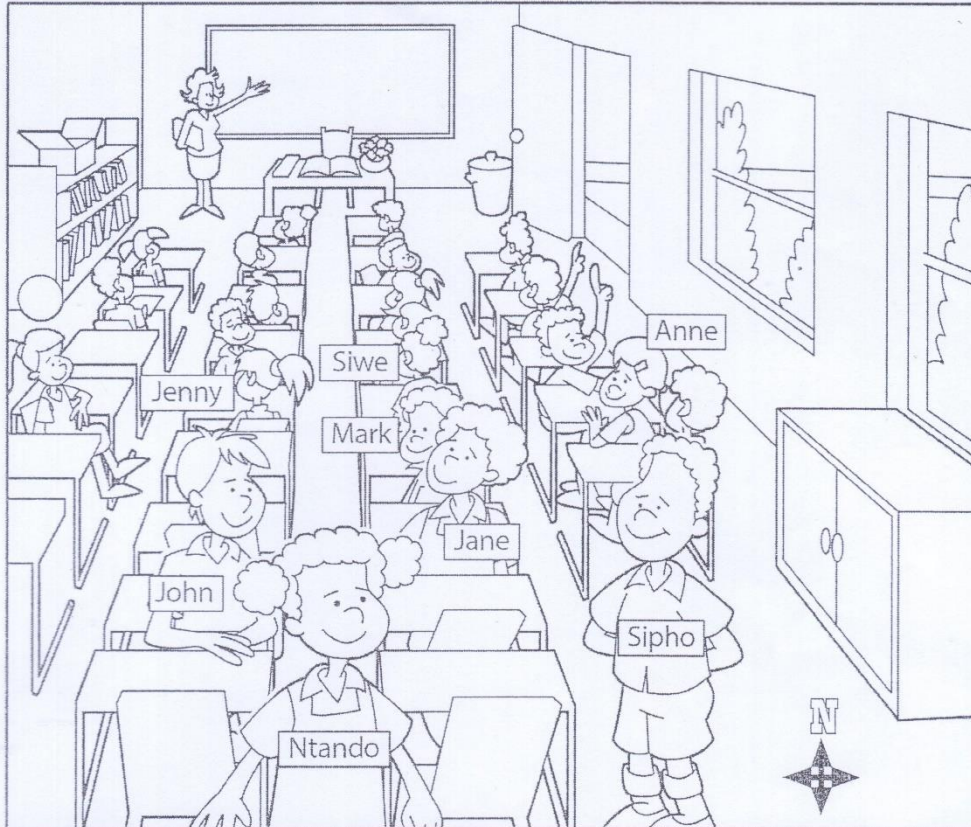

- A compass is used to show direction. The needle of a compass always points north no matter where on Earth you may be.
- Maps always indicate (show) that north is at the top of the map, south is at the bottom, east is on the right and west is on the left. THESE DIRECTIONS CAN NEVER CHANGE.
- The sun always rises in the east and sets in the west.

Complete the compass below and colour it in

Activity 1
